WHAT'S IN IT FOR FARMERS?

On June 4, 1991 – the next Census of Agriculture – stand up and be counted as an important member of Canada's farm community. Farmers have always given the Census their full co-operation; they know what's at stake.

What is at stake? Your capacity for making strong business decisions, your access to quality services, your impact on the environment and more ... depend on everyone's participation in the Census.

How can farmers use Census of Agriculture information? The Census provides the industry overview needed for making business decisions and highlights important farming trends. With the Census as a base, you can evaluate your own agricultural methods (cropping, production and soil conservation), weigh alternatives and act on facts rather than on speculation.

Do you demand quality products and services? You should not have to travel far to get quality products and services. You benefit when companies specializing in fertilizers, pesticides, feed, fencing, seed and farm equipment use Census data to find out where to locate. A farm equipment company in your community, for example, means ready access to equipment sales, rental, parts and maintenance.

What about the environment? Our environment needs protection. Farmers – like everyone else – are doing their part. The Census identifies farming practices and measures how these practices are changing to deal with environmental concerns.

What about the role of women in agriculture? The 1991 Census form allows for more than one operator to be named to show the reality of women's contribution to the farm industry in Canada. The role of women as decision-makers on the farm will be better reflected in the data.

How else do you benefit from everyone's participation? In the case of emergency situations and natural disasters, Census of Agriculture data are used to quickly locate and identify agricultural areas affected – possibly your area – and to assess the impact of the damage. Associations and unions use the data for measuring the financial well-being of farmers and for lobbying on your behalf. Accurate data from the Census of Agriculture are an important part of the information needed to support government stabilization and price support programs.

Is being well informed important to you? Farm organizations and the farm media use the Census of Agriculture database to report on farm industry facts, trends and developments – details essential for getting the viewpoint of farmers in front of legislators and the Canadian public.

You benefit from the Census ... so take a few minutes on June 4 and fill out your form and mail it back. There's a lot at stake.

FOREWORD

This handbook for Prince Edward Island has been prepared as a ready reference on agricultural statistics by the Atlantic Office of Statistics Canada and the Marketing Services Division of The Prince Edward Island Department of Agriculture.

The greater part of the material contained herein has been compiled from Statistics Canada sources and surveys. Acknowledgement is made to Agriculture Canada and other sources for data obtained from their publications.

We would like to hereby dedicate this publication to the farmers, processors and others associated with the industry who, by their cooperation through surveys and censuses, made the information available. Without their cooperation in returning the data on their operations, this book would not be possible.

We would like your input into this publication. Should you locate errors or have suggestions for new tables, please feel free to contact us.

Additional information may be obtained by contacting Statistics Canada or the Marketing Services Division of The Prince Edward Island Department of Agriculture.
